***Response to Amendment***

Applicant's amendment received on May 8<sup>th</sup>, 2007 has been fully considered and entered, but the arguments are not deemed to be persuasive.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Aoki et al. (US Patent no. 6,169,766) for the same reasons as previously set forth in the last office action mailed on February 9, 2007.

***Response to Arguments***

Regarding claims 1-2, the applicant argues that claim 1 requires estimating a motion vector for the downsampled blocks by scaling one of the input motion vectors for the blocks; and there are no input motion vectors with a subsequent selection.

The examiner respectfully disagrees since the claim does not specifically call for scaling input motion vector. The claim calls for scaling on of the motion vectors corresponding to a downsampling of the DCT. Aoki does scales a motion vector in col. 3, lines 3-9,

and col. 4, lines 27-30. Aoki particularly notes in col. 8, lines 40-43 that the motion vector detecting includes a DCT section... thus if the DCT components are to be used for setting sub-sampling, not only an original DCT but also additional DCT calculation are required. In other words, even if Aoki did not particularly express "estimate the motion vector corresponding to the downsampling the DCT blocks by scaling one of the motion vectors", it does anticipate such step in the disclosure.

Regarding claim 3, the applicant did not present any specific argument; it is therefore, the examiner belief that the claim was properly rejected.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

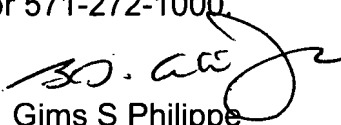

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
